PROFILE

Computer Science student at Kingston University with a strong academic record and nearly eight years of professional experience within Royal Mail. Having successfully balanced full-time employment with university studies, I have developed resilience, self-management, and a disciplined approach to achieving objectives.

Seeking a 12-month industrial placement where I can combine my technical knowledge, analytical thinking, and practical business experience to contribute to meaningful technology solutions while continuing my professional development.

EDUCATION

Kingston University, London, UK (2024 – 2027)

BSc (Hons) Computer Science

First Year Average: **85%**

Second Year Average: **92%**

Modules: Programming 1 & 2, Requirements Analysis & Design, Professional Environments 1 & 2, Computing Fundamentals, Computing Systems, Database – Driven Application Development

TECHNICAL SKILLS

Programming Languages: Java, C#, C++, SQL, JavaScript, HTML, CSS, MATLAB.

Web & Application Development: React, Node.js, Express.js, REST API, Oracle APEX, Microsoft Power Apps.

Databases & Data Management: MariaDB, MySQL, Oracle Database, SharePoint Lists.

Development Tools: Git, GitHub, GitLab, Jira, Figma, XAMPP, Postman, Visual Studio Code.

Software Development Practices: Software Development Lifecycle (SDLC), Agile, Scrum, Kanban, Waterfall, Requirements Analysis, Database Design.

Artificial Intelligence: ChatGPT, Codex, Ollama, Claude, Prompt Engineering, AI-Assisted Development, Debugging, Documentation, and Research.

PROJECTS

AppFactory – FacilityHub (In Progress) | Summer Internship | [CSE Connect](#)

SDLC, Agile, Kanban, React, Node.js, Express.js, Figma, Requirements Engineering

- Collaborating within an Agile development team of 4 to design and develop a web-based trades management platform.
- Contributing to requirements analysis, system design, prototyping, and implementation activities.
- Developing frontend and backend using React, Node.js, and Express.js.
- Participating in sprint planning, task management, and progress tracking using Kanban principles.

ePortfolio Website (In Progress) | Personal Project | [GitHub Pages](#)

React, JavaScript, HTML, CSS, Responsive Design, UI Design

- Developing a responsive portfolio website to showcase projects, technical skills, and professional achievements.
- Implementing reusable React components and modern user interface design principles.
- Applying responsive design techniques to ensure compatibility across desktop and mobile devices.

TravelJabs Clinics Management System | Database – Driven Application Development | [Kingston University](#)

GitHub, React, Node.js, Express.js, MariaDB, XAMPP, REST API, Database Design

- Developed a full-stack clinic management web application supporting Patients, Clinicians, and Managers.
- Implemented appointment scheduling, patient record management, role-based access functionality, and protected routes.
- Designed and integrated REST APIs to facilitate communication between frontend and backend services.
- Designed and managed a MariaDB database, using XAMPP for local development and Postman for API testing.

Student Expense Tracker | Professional Environments 2 | [Kingston University](#)

SDLC, Microsoft Power Apps, SharePoint Lists, Data Visualisation, Business Applications

- Collaborated in a team of 7 to design and develop a budgeting application enabling students to record income and expenses.
- As the project developer, implemented monthly budget tracking, category-based spending analysis, and financial reporting features.
- Improved data management and scalability through integration with SharePoint Lists.

CV Builder | Programming 2 | [Kingston University](#)

Visual Studio Code, Java, Java Swing, GitLab, MVC, Object-Oriented Programming, Desktop Applications

- Developed a desktop application using Java Swing to create and manage CV content through a graphical user interface.
- Implemented object-oriented programming principles, event-driven programming, and data management features.
- Designed reusable components and interactive forms to improve usability and maintainability.

Bright Ideas Competition - Smart Kitchen | Finalist | [Bright Ideas Competition](#)

Entrepreneurship, Business Analysis, Innovation, Business Analysis, Product Design, Presentation Skills

- Developed an AI-powered food management and meal-planning application concept focused on reducing household food waste while improving personal health.
- Produced business model, value proposition, market research, and financial planning documentation.
- Participated in the finals, presenting the concept to judges and stakeholders as part of a university entrepreneurial competition.

Games Portal | Requirements Analysis & Design | [Kingston University](#)

SDLC, Requirements Engineering, Figma, UI/UX Design, Prototyping, Usability Testing, Documentation

- Collaborated within a team of 5 to analyse, design, and prototype a digital games distribution platform.
- Conducted market research, competitor analysis, stakeholder analysis and requirements elicitation.
- Produced user stories, use cases, wireframes, and interactive prototypes, using industry-standard design techniques.
- Applied software development lifecycle methodologies to create a user-centred system.

LEADERSHIP & ACTIVITIES

Course Representative | Kingston University

- Represent student feedback and contribute to communication between students and academic staff.
- Participate in meetings focused on improving the student experience.

Activities & Events

- Placement Bootcamp (2024, 2025)
- Enterprise & Innovation – Pitching & Launch (2025)
- Retro Gaming Event (2024)

PROFESSIONAL EXPERIENCE

Royal Mail | Postal Worker | 2018 – Present

- Manage delivery routes and ensure timely and accurate distribution of mail and parcels.
- Developed strong organisational, communication, and problem-solving skills in a fast-paced environment.
- Demonstrated reliability, responsibility, and customer service excellence.

Shoryu Ramen | Restaurant Manager | 2016 – 2018

- Managed daily operations, staff scheduling, inventory control, and customer service.
- Led and trained team members while maintaining operational standards.
- Developed leadership, planning, and decision-making skills.

CERTIFICATIONS

Course Representative – Kingston University (2026)

Generative AI – LinkedIn Learning (2025)

Data Protection – Kingston University & MetaCompliance (2025)
